

Portfolio Intelligence Report

Professional Bio

Priya Menon is a Business Analyst specializing in operations-focused consulting environments. With an MBA in Operations and Finance and a B.Tech in Electronics and Communication Engineering, she combines strong analytical skills with technical proficiency in SQL, Power BI, Excel, and Python. Priya has experience in developing and standardizing reporting templates, building interactive dashboards, and coordinating with stakeholders to drive process improvements and data-driven decision-making. She is also skilled in mentoring junior analysts, ensuring quality and consistency in reporting outputs.

About Me

As a Business Analyst passionate about bridging operations and analytics, I leverage my MBA in Operations and Finance alongside technical expertise in SQL and Power BI to deliver actionable insights and improve business processes. I have supported operations teams by standardizing reporting formats, creating automated SQL templates, and developing dashboards that enhance visibility into service performance. My approach emphasizes clear stakeholder communication, thorough documentation, and continuous process improvement. I am eager to contribute to consulting projects that require data-driven decision support and collaborative problem-solving.

Personal Tagline

Business Analyst | Operations & Reporting Specialist | Driving Data-Driven Insights and Process Improvement

Project Showcase

- Service Turnaround Tracking Dashboard
- SQL Reporting Template Automation

Project Case Studies

- {'Problem': 'Operations teams lacked real-time visibility into service turnaround times, causing delays in identifying bottlenecks and inefficiencies.', 'Solution': 'Developed an interactive Power BI dashboard that visualizes service turnaround metrics, enabling teams to monitor performance and make timely decisions.', 'Technology': 'Power BI, SQL', 'Contribution': 'Gathered stakeholder requirements, designed dashboard visualizations focusing on key performance indicators, and iterated based on user feedback.', 'Outcome': 'Improved operational transparency and supported data-driven decision-making for service delivery management.', 'Lessons Learned': 'Engaging stakeholders early in the design process ensures dashboards meet user needs and drive adoption.'}
- {'Problem': 'Weekly operational reviews were time-consuming due to manual report generation and inconsistent reporting formats.', 'Solution': 'Created reusable SQL reporting templates to automate data extraction and standardized tracker formats to improve reporting consistency.', 'Technology': 'SQL, Excel', 'Contribution': 'Led the development and implementation of SQL templates and standardized reporting trackers, collaborating with operations teams for alignment.', 'Outcome': 'Reduced manual effort in report preparation and enhanced accuracy and consistency of weekly operational reports.', 'Lessons Learned': 'Standardization and automation significantly increase efficiency and reduce errors in recurring reporting tasks.'}

Quality Notes

- Portfolio content is professional, well-structured, and aligned with the target Business Analyst role in consulting.
- Strong emphasis on technical skills (SQL, Power BI, Excel, Python) and relevant projects with clear problem-solution-outcome format.
- MBA education and certifications are clearly presented, enhancing credibility and recruiter confidence.
- Skills are logically grouped and comprehensive, supporting ATS parsing and recruiter scanning.
- Project case studies effectively demonstrate practical application and impact, though quantifiable metrics could be more explicit.
- Personal and professional bios are concise, clear, and tailored to the consulting industry and Indian market.
- SEO meta title and description are well-crafted for online visibility and keyword relevance.
- Contact information is mostly complete but placeholders remain for email and LinkedIn URLs, which should be updated.
- The portfolio maintains a consistent professional tone and readability, suitable for recruiters and hiring managers.
- Some minor improvements needed in explicitly quantifying achievements and integrating more business analysis methodology keywords.
