Portfolio quality: 58 -> 82 | Recruiter impression: 55 -> 80

Rendering and content: showcase 1 -> 1, case studies 1 -> 1

SEO change applied: True | Performance: 107.62 seconds

Known Issues

Portfolio rendering currently focuses on a single-page HTML export rather than a multi-page website system, which keeps the output reliable and easy to deploy.

Case study richness depends on the amount of project detail provided by the candidate, and the engine remains intentionally conservative to avoid unsupported claims.
