

Candidate Zeta

Engineering Manager

Professional Summary

Strategic engineering leader with over 10 years of progressive experience managing software delivery and engineering teams within cloud-centric environments. Demonstrated expertise in aligning technical roadmaps with business objectives, leading cross-functional architecture collaboration, and driving operational stability during periods of rapid scale-up. Proven ability to mentor engineering leads, influence stakeholder engagement, and standardize processes to enhance delivery efficiency and product scalability. Committed to building high-performing teams through effective hiring support and leadership development.

Leadership & Management Experience

- Directed multiple engineering teams through full software delivery lifecycles, ensuring alignment of roadmap priorities with strategic business goals and delivering high-quality releases on schedule.
- Led architecture review sessions and collaborated with cross-functional stakeholders to uphold scalable, maintainable system designs that support evolving business needs.
- Played a key role in hiring initiatives, contributing to talent acquisition strategies that expanded engineering capacity and strengthened team capabilities.
- Mentored engineering leads to cultivate leadership skills and technical excellence, fostering a culture of continuous improvement and succession planning.
- Orchestrated release planning and delivery management, stabilizing operations during critical scale-up phases to maintain productivity and consistent release cadence.
- Exercised strong stakeholder management by coordinating cross-team collaboration during roadmap planning and architecture discussions, ensuring transparency and alignment.

KEY PROJECTS & STRATEGIC INITIATIVES

Sample Platform Modernization and Engineering Process Standardization

- Spearheaded a platform modernization initiative that replaced legacy systems, significantly enhancing maintainability and scalability to support future growth.
- Standardized engineering processes across multiple teams, improving consistency, collaboration, and delivery efficiency, thereby enabling smoother project execution and faster time-to-market.

Technical Skills & Tools

Technical Skills:

- Java, Python
- Cloud Computing (AWS)
- Architecture Review

Leadership & Management:

- Team Leadership
- Stakeholder Management
- Mentoring
- Delivery Management

- Release Planning
- Roadmap Coordination

Tools & Platforms:

- Jira
- Confluence
