

Candidate Alpha

VLSI Engineer

Education

Bachelor of Engineering in Electronics and Communication Engineering

- Completed coursework in VLSI Design, Digital Electronics, and Physical Design Flow

Projects

- Developed and simulated digital circuits using Verilog, reinforcing core VLSI design principles.
- Reviewed and analyzed placement and routing concepts to understand physical design challenges and methodologies.

Technical Skills

Hardware Description Languages: Verilog

EDA Tools and Software: ICC, ModelSim, Linux

Core Technical Knowledge: Digital Electronics, Physical Design Flow

Soft Skills: Problem Solving, Documentation, Teamwork, Analytical Thinking

Internships

- Gained foundational understanding of physical design flow concepts through structured training sessions, enhancing readiness for VLSI design tasks.

Certifications

- Completed VLSI workshop focused on design fundamentals and industry practices.
