

Anita Rao

DevOps Engineer

Professional Summary

Computer Science graduate with strong academic foundation in cloud computing and operating systems. Practical experience in designing CI/CD pipelines using GitHub Actions and Docker, and deploying cloud infrastructure on AWS. Completed an internship focused on deployment scripting and Linux server management. AWS Cloud Practitioner certified and led a team project, demonstrating readiness to contribute effectively in DevOps roles.

Education

B.Tech in Computer Science

Relevant Coursework: Cloud Computing, Operating Systems

Projects

CI/CD Mini Project using GitHub Actions and Docker

- Designed and implemented a CI/CD pipeline integrating GitHub Actions with Docker to automate build and deployment processes.
- Streamlined application delivery by containerizing services and automating workflows, enhancing deployment consistency.

Cloud Deployment Practice Project on AWS

- Deployed cloud infrastructure components on AWS to simulate real-world application hosting scenarios.
- Applied AWS best practices to configure and manage cloud resources, reinforcing understanding of cloud computing concepts.

Technical Skills

Cloud & DevOps Tools: AWS, Docker, GitHub Actions

CI/CD & Automation: Git, Bash

Programming Languages: Python

Operating Systems: Linux

Internships

Internship - Deployment Scripting and Linux Server Support

- Executed deployment scripting tasks and conducted Linux server health checks to support stable application environments.

Certifications

AWS Certified Cloud Practitioner
