

Rahul Sharma

VLSI Engineer

Education

Bachelor of Technology in Electronics and Communication Engineering

Relevant Coursework: VLSI Design, Digital Electronics, Embedded Systems

Projects

Digital Design Mini Project

- Designed and simulated digital circuits using Verilog, demonstrating foundational skills in digital IC design and verification.
- Utilized simulation tools to validate design functionality, enhancing understanding of digital design workflows.

Technical Skills

VLSI Design & Verification: Verilog basics, VLSI basics, Digital Electronics, ICC tool exposure, ModelSim

Operating Systems & Tools: Linux

Soft Skills: Problem solving, Teamwork

Internships

Verification Documentation Support Internship

- Supported verification activities by creating and maintaining detailed technical documentation to facilitate clear communication within the engineering team.

Certifications

NPTEL Certification in VLSI Design Basics
