

Candidate Beta

DevOps Engineer

Education

B.Tech in Computer Science

Sample University, Sample City

Relevant Coursework: Cloud Computing, Automation

Projects

Dockerized Deployment Project

- Designed and implemented a containerized application deployment using Docker to ensure environment consistency and simplify delivery.
- Demonstrated foundational understanding of container orchestration principles aligned with DevOps practices.

Technical Skills

Programming & Scripting: Python, Bash

Cloud Platforms & Infrastructure: AWS, Terraform

Containerization & Orchestration: Docker, Kubernetes

CI/CD & Version Control: Jenkins, Git, GitHub Actions

Monitoring & Logging: Prometheus, Grafana

Operating Systems: Linux

Certifications

Cloud Fundamentals Certificate
